

Diamond Star Pellets

Diamond Star PAM

Polyacrylamide Tackifier (PAM)

Diamond Star PAM is an anionic linear polymer specifically designed to increase the performance of fiber or paper mulch. The high molecular weight and ionic bond of Diamond Star PAM binds the hydroseeding matrix to the soil particles.

Reduces soil erosion and sediment displacement

Ionic bond to the soil particles

Optimal Viscosity Improves pump performance

Allows water into the mulch matrix increasing water holding capacity

Economical with a low application rate per acre

COMPOSITION

Anionic linear copolymer of acrylamide

VISCOSITY

2150 to 2410 cps

PACKAGING

18 Lbs Case - (6), 3 # Waterproof Jugs

Installation

HydroSeeding

Slowly pour in Diamond Star PAM into the machine while water is in the tank agitating. Continue mixing and add seed, mulch, & fertilizer. Recommended rates will vary based on soil type, slope, and site conditions.

<i>Slope :</i>	<i>5:1</i>	<i>4:1</i>	<i>3:1</i>	<i>2:1</i>	<i>1:1</i>
<i>Lbs/Acre:</i>	<i>3</i>	<i>6</i>	<i>9</i>	<i>12</i>	<i>15</i>

Dust Suppression

Apply to non-traffic areas at a rate 3 Lbs per 1000 gallons of water on flat surfaces up to 15 lbs per 1000 gallons of water on 1:1 slope gradients.

Complies with NSF International ANSI/NSF 60, drinking water
